

## VOICES IN THE DARK

### Learn to listen again

Today's world is full of noise that can be stressful and distracting. The information overload leads to a natural filter and some say we have forgotten how to really listen.

The event concept Voices in the Dark aims at regaining the full ability to listen. And listening without doubt leads to better communication and more effective collaboration.

Using nothing but human voices, singers, speakers and fascinating voice artists make you focus on one sense only: The sense of hearing. You will be amazed, how versatile the human voice is. And how strong a message can be, when it's pitch dark.
